

Lianne Brown

Case Manager

Registered Nurse

NMC 97J0483E

Disability/Injury:

Acquired brain injury; cerebral palsy; chronic pain; general musculoskeletal/soft tissue injuries; management of complicating factors; spinal cord injury; tracheostomy; ventilation

Adults and Young Adults

Lianne has over 17 years post qualification experience and is a highly motivated and dedicated individual. She is a client-focused Nurse with proven strengths in people and team management, leadership and staff development. She is experienced in complex clinical care provision, the planning and implementing of complex client discharges from hospital to home and conducting timely assessments of individual needs.

Through Lianne's past experience of complex cases, she has shown her willingness not only to care for her clients but also support the client's immediate family with a holistic approach to care, whilst keeping close liaison with the multiple health care professionals required to meet complex client needs.

Lianne has 11 years' experience of managing complex care in the community, including but not limited to; spinal cord injured clients, ventilator dependent individuals and their families, clients with cerebral palsy and acquired brain injury. Lianne is efficient in client assessments and planning care and interventions to meet an individual's needs on both a short term and long term basis. Throughout Lianne's care career Lianne has successfully case managed challenging clients and their families and effectively built working relationships with clients to ensure effective management of client difficulties and issues.

Lianne has vast experience in managing and supervising Nurses/Operational Managers and Personal Care Assistants, co-ordinating a multidisciplinary approach to meet individual needs.

Location:

North West England covering Cumbria, Scotland and Scottish borders.

Professional Experience:

Lianne qualified as a Registered General Nurse in adult nursing from Salford University in 2000.

Lianne embarked upon her nursing career in a General Intensive Care Unit within a large North West teaching hospital. Experience was gained in the nursing of acutely ill patients with a variety of complex needs and long term conditions, including but not limited to, respiratory and renal conditions, acute trauma cases, neurological conditions, head injuries, spinal cord injuries. The role included care planning, delivering patients holistic care needs and working with the critical care teams to effectively manage and plan care. Lianne was keen at this time to also be involved in the Critical Care Outreach Team and repatriation of the critically ill.

In 2004 Lianne gained her BSc Honors degree as a Specialist Nurse Practitioner in Adult Intensive Care. After six years in Intensive Care and working up to a senior level, Lianne left the public sector in 2006 to work in the private healthcare sector.

Lianne's experience in the private sector has been in setting up and managing complex care packages at individual's homes and in the community setting, for adults and children with a wide range of disabilities and long term conditions. These include spinal cord injured and acquired or traumatic brain injury clients. Lianne has vast experience in arranging and managing the discharge of patients with complex care needs back to their home environment to live independently, liaising and co-ordinating with multi-disciplinary teams across

the public and private sector, statutory services and health commissioners to ensure clients' holistic needs are fully and appropriately met.

In 2009 Lianne was promoted to the role of Regional Clinical Manager and as such line managed a team of operational and clinical staff to personally deliver and deliver by delegation, a high quality clinical care service to all customers in line with care plans, contracts and individual assessment needs throughout the North of England. Part of Lianne's role in line with the business was to ensure CQC Standards were applied and adhered to across the North of the UK. She also worked in close partnership with multi-disciplinary teams across the community setting in both primary and secondary care, specifically the Continuing Health Care Commissioning Teams in respect of assessments, reviews, on-going issues and Safeguarding incidents. As a Regional Clinical Manager, Lianne was part of the safeguarding committee, responsible for reviewing safeguarding alerts across the business looking at lessons learned, best practices and quality improvement plans, ultimately implementing any changes into practice.
